

GAS OR ELECTRIC?

In many cases a refrigerator is the single largest power consuming appliance in a home. If you are living with a Stand Alone Power Supply (SAPS) system, it is therefore essential that you carefully consider your refrigeration needs. Going Solar has a range of high efficiency fridges in LP Gas, 12 volt DC and 240 volt AC.

1. Initial up-front cost for the solar system will be greater using an electric fridge but there will be no ongoing fuel costs.
2. The inconvenience and ongoing cost of refilling LPG bottles. If you are using LPG for other purposes such as cooking anyway, this may not be as significant a factor.

VESTFROST—240V

Scandinavian style and efficiency:

This European-made fridge/freezer is ideal for large storage needs.

Flexible shelving and door options maximize available capacity.

Features include:

- Multi-flow cooling system
- Fully automatic defrosting of the fridge and freezer
- Reversible door
- Front and rear rollers—Leveling feet
- Adjustable shelves and removable door racks
- Fast freezing compartment

MODEL	H x W x D (CM)	FRIDGE/FREEZER	Whr / DAY	RRP WHITE
CW540NF	182x76x68	362L / 107L	1300	\$2790

Fridge only:

- Adjustable shelves
- Reversible doors
- Built-in condenser
- Bottle shelf holds five 1.5 litre bottles
- Adjustable feet in front, castors at back
- Easy to build-in
- Well-arranged childproof control panel with built-in light
- Removable kick plate permits cleaning underneath

MODEL	H x W x D (CM)	FRIDGE	Whr / DAY	RRP WHITE
BSK360	186x60x60	333L	460W	\$2420

Chest freezer (240V):

Uses less than half the power required by conventional chest freezers without sacrificing features or using CFC foam or refrigerant.

- Laminated steel lid with interior light
- Aluminium liner
- Built-in condenser
- Locking handle
- Temperature warning lamp and alarm
- Childproof temperature control
- Freezing calendar in lid
- Partition divider
- Electricity-on indicator lamp
- Defrost water drain-hole.

MODEL	H x W x D (CM)	CHEST FREEZER	Whr / DAY	RRP
SE325	85X156X60	312L	710W	\$2180

CONSUL LPG GAS FRIDGES

Consul gas refrigerators are excellent performers in RAPS systems. They can reduce your system size significantly. Their sleek casing makes them virtually indistinguishable from a normal fridge.

MODEL	H x W x D (CM)	FRIDGE/FREEZER	gms / DAY	RRP
Gas only	145x61x72	220L / 31L	500W	\$1990
Gas/240V	145x61x72	220L / 31L	1750Wh	\$2150

BUSHMAN

With the refrigerator set at -4C with an ambient temperature of +24C the BUSHMAN uses a mere 16amp hours per day. When the compressor is running the current draw is approx 2.5 amps.

Smaller capacity solar panels and batteries can be used to operate it. The Bushman is 12 volt DC, but a 240 volt AC lead is also available. Dula lids, 3 Baskets and 10 litre extension collar come as standard accessories.

3 year warranty.

Designed in Australia: For harsh Australian conditions. Powder coated steel cabinet, stainless steel hinges & durable polycarbonate lids.

12V Bushman SC-35/42/52 Fridge/ Freezer 35/42L	\$1195
