"I was initially drawn to Going Solar because of your reputation and I wasn't disappointed. I had a good feeling from the word go. Working with like-minded people just always seems to work better! So please pass on my thanks to Stephen and also the installation team Ross and Paul. The manner in which they conducted themselves on site was both pleasant and professional making the installation absolutely painless."

"Congratulations ! You have indeed hit the bullseye !! ... Thank Stephen for his assistance, but also pass this message on to him, in regards to our dealings with you. We found [Going Solar system designer] Emiliano to be professional, responsive, highly knowledgeable, engaging and always positive. No questions were challenged, just answered with perfect clarity. He is a true asset to Going Solar."

Solar Hot Water System

"Darren [the plumber] rang me yesterday to explain it all, which I appreciated. As I said, the whole system is working well. During the summer it seems that we've generated more [energy] than we actually used, which has to be a good thing. I know that winter will be another story but we're happy with things."

"No electricity bills for the last four years thanks to the sound technical advice and quality components purchased from Going Solar. These folk have been in the alternative energy business for a very long time and that experience is evident. All of my off-grid solar system has been purchased through going solar and I have had no problems. I have also purchased bee keeping supplies and satisfied with the equipment. Thank you Stephen and the team at Going Solar."

**Glen Pascoe
Walkerville

PV System – Off-Grid

"Thank you for supplying and excellent solar system. Also, the inspector (Joel) said that he thought that the system was an excellent one and well scoped for the applications that I will use.

"As an aside, [now that I have power] the kangaroos seem to be interested but not alarmed by the opera that has been played to them. I am sure that their appreciation will improve with time."

(Earlier) Testimonials

PV System – Off-Grid

“All my dealings with Going Solar, whoever answered the phone, or came in site have been excellent. The system has worked better than I had anticipated, fulfilling all the criteria set out in our discussions. I never hesitate in recommending the team at Going Solar: professional, friendly, and efficient. Thanks to ‘Team Going Solar,’ for reducing my greenhouse emissions and providing great service all round.”

**Chris Shepherd-Clark
Kynton

PV System

“After researching and comparing several solar energy companies, we chose Going Solar because of their excellent customer service. Many companies only wanted to quote over the internet and were not keen to send out somebody to inspect the site and consult on alternatives. Because our site was a bit out of the ordinary, some companies did not even want to quote! Going Solar gave us the best advice and consulted with us every step of the way. We are happy with our installation and are pleased to recommend Going Solar to anyone considering solar power.”

**Jim Beringer
Port Melbourne

PV System

“I had heard of Going Solar from friends in my area. But additionally I have worked in the Solar/PV industry for some years and have come to respect the good people at Going Solar.”

“The service I received from initial quote to final commissioning was exemplary.”

“On the recommendation of the helpful folk at GS who scrutinized my home location and provided me with several available options, I chose a 2kw system with 8 panels and an SMA controller.”

“The installation was of a high standard and the installation team very friendly and helpful. I am very happy with the system so far.”

**Roger Vise

SHW System – with Wood Stove

“We've been very satisfied with our dealings with Going Solar and are pleased with the operation of our system. We had expected to need our gas booster occasionally in spring or autumn, but we haven't ... since the beginning of August 2008. So our hot water has cost us nothing since then. Even so close to the winter solstice, on sunny days we are getting good solar contribution. Boosting from the slow combustion stove gives us the satisfaction of having heating, cooking and hot water all from the one energy source.”

**Lyn
Alphington

Jemena 2/7/13**

PV System – Off Grid

“I would recommend Going Solar to everyone - they are outstanding and very professional. The system fitted has now become a key feature of our carbon neutral facilities including water tanks, compost loos and eco-friendly buildings and now it is all complemented by our wonderful ‘off the grid’ solar system fitted by the Going Solar team.”
